Angie Spears
Web Developer

I am an ambitious, self-motivated and solutions-driven individual. I recognize needs, perfect the details and use strategic thinking to achieve goals.

Development Experience

General Assembly
Full Stack Web Developer Immersive Student

Oct. 2017 - Jan. 2018

Developed fluency in a full-stack web development immersive program focused on core languages and best practices in object-oriented programming, MVC frameworks, data modeling, and test-driven development.

Web Development Projects

Food Search: Website | Code
Used HTML, CSS, Express.js, React.js, and Node.js to develop this food search application.

Shopping List: Website | Code
Used HTML, CSS and Ruby on Rails to develop this shopping list application.

Home Search: Website | Code
Used HTML, CSS and MERN Stack to develop this home search application in collaboration with other students.

US Capitals Game: Website | Code
Used HTML, CSS and Javascript to develop this US Capitals Trivia Game application.

Other Experience

Youth For Tomorrow Case Manager
Aug. 2016 - Sep. 2017

Managed the approval process of over 50 immigrant children to safely reunite them with their relatives in the United States. Used keen attention to detail, problem solving, and stakeholder management skills to complete the process.

Consumer Technology Association Membership Intern

May 2016 - Aug. 2016

Worked with a team to add product companies to the association and managed current relationships through webinars and start up outreach.

Youth For Tomorrow Office Manager

Mar. 2014 - Feb. 2015

Used strategic administrative skills to manage a client portfolio of over 1,000 people. Used CRM software to add over 300 clients and maintain schedules of psychiatrists.
